The workgroup is continuing work on the “Status Check” project, which has been renamed “Sustainable Growth and Conservation Indicators – Status Check & Measuring Progress.” If desired, staff are prepared to brief the Commission at the Commission’s January 26 meeting.

The workgroup held a conference call on January 12 and discussed possible additions to its work program for 2015. Participants concluded that it is premature to prepare a 2015 work plan. The Workgroup is interested in first obtaining suggestions from the Commission, and from the incoming Administration and Secretary of Planning, regarding topics of interest.
